

Chapter 3 Exam Outline:

Nature - Nurture and Human Diversity

Pick a concept, idea, theory from chapter 3 in the text book, discuss the significance of your topic as it relates to a better understanding of human behavior and or mental processes. What are the implications of such information/ knowledge? Reference the topic/theory and discuss in your own words how it contributes to a better understanding of humans. Include written discussion of the influence and or interaction of Nature and Nurture.

Your discussion must include references from the text and from three or more of the following:

Editing our DNA
