

Psychology 12 Lesson 9

Review from last Class: (lesson 8)

Journal Entry #8

Part 1: Social Loafing <https://youtu.be/vsfkk3tQmtw>

Part 2: Social loafing experiment <https://youtu.be/ZsNOPqnjv0M>

Have you experienced social loafing while doing group work? Explain what happened, From Social Psychology research into social loafing what can be done to reduce it. List four

1. Limit group size.
2. Challenging *goals* so everyone needs to contribute.
3. Benchmarking with other groups can increase motivation.
4. Make individual contributions identifiable.
5. Increase involvement by pointing out individual efforts and facilitating the team process, recognize how working as a team will enable you to get more done.

Social Psychology Experiment Slides 1-2 completed by break, slides 3-7 checked by end of class. Conduct experiment on or before next class (slides 8-9). Analyze and write up results (slides 10-11) and submit presentation for marking by end of next class.

Today's Class (Lesson 9)

Social Facilitation: Phenomenon of a stronger performance with familiar tasks when in the presence of others.

Example: Accelerating from an intersection when the light turns green. People accelerate 15% more quickly when another car is beside them than when alone at an intersection. (Towler, 1986)

Journal Entry #9 Deindividuation

Part 1 <https://www.youtube.com/watch?v=dmqvIw3JaKY>

start to 2:40 (What it is) Identify the four elements that make deindividuation likely.

Deindividuation: contributing factors

- 1. Reduced sense of responsibility as in social loafing**
- 2. Arousal increase as in social facilitation**
- 3. Anonymity – part of a group – costume or uniform increases this feeling of anonymity**
- 4. Group size- Larger the group the above three are more likely to occur**

Part 2: <https://www.youtube.com/watch?v=wkzVNKrn> Local ex.

Class discussion: Can you identify the interplay of the four factors?

Student progress reports handed out - You have one week to get late work submitted for marking. Dead line: You have until Monday next week to submit any late work.

Conduct Social Psychology Experiment - Analyze and write up results (slides 1=9) and submit presentation for marking by end of next class. You will present next class.
